
workshop on bio-ontologies

Friday, October 28, 2005

205 Alfiero Center

University at Buffalo · North Campus

co-sponsored by The National Center for Biomedical Ontology

program

- 10:00 am **Frank Hartel**, National Cancer Institute
caCORE: Biomedical Ontologies and Semantic Integration
- 10:40 am Coffee
- 11:00 am **Sumi Yoshikawa**, GSC/Riken, Yokohama
*Genome-Pharmaco-Ontology:
The Link between Pharmacology and the Gene Ontology*
- 11:40 am **Suzanna Lewis**, Lawrence Berkeley National Laboratory
Ontology and Biomedicine: Goals of the National Center for Biomedical Ontology
- 12:20 pm Lunch
- 1:30 pm **Olivier Bodenreider**, NLM Medical Ontology Research
Enriching Bio-Ontologies with Non-Hierarchical Relations
- 2:10 pm Coffee
- 2:30 pm **David Hill**, Gene Ontology Consortium and **Barry Smith**, University at Buffalo
Symposium on the Gene Ontology
-

participants

Olivier Bodenreider leads the Medical Ontology Research Group at the Lister Hill National Center for Biomedical Communications, National Library of Medicine.

Frank Hartel is Director of Enterprise Vocabulary Services in the Center for Bioinformatics of the National Cancer Institute.

David Hill is Senior Scientific Curator on the Mouse Genome Informatics Project at the Jackson Laboratory, working especially on the Gene Ontology and on GO annotations.

Suzanna Lewis is Director of Bioinformatics for the Berkeley Drosophila Genome Project and a founder of the Gene Ontology Consortium.

Barry Smith is SUNY Distinguished Professor of Philosophy and Director of the National Center for Ontological Research.

Sumi Yoshikawa is Leader of the Bioknowledge Federation Research Team, RIKEN Genomic Sciences Center (GSC) Yokohama, Japan.
